

Greenlander Pro

Nigel Dennis Kayaks (NDK)

Atlantic Kayak Tours Says: The Greenland Pro is a faster version of the Greenland and has a keyhole cockpit. The Pro version of the Greenlander keeps the traditional lines of a true Intuit kayak. While many people liked the way the Greenlander paddled, they could not get over the extra small round cockpit. The stern gets reaction from everyone. Some people like the stern, others hate the look. While this kayak appeals to stick paddlers, all kayakers should give it a go. It is nice to see a kayak that looks different from most other kayaks on the market.

Designed in response to demand for a fast racing sea kayak, the Greenland Pro is a slightly longer cousin of the Greenlander with a higher deck and a large keyhole cockpit. The boat has a traditional hard chined design.

NDK Says: The Greenland Pro has evolved from the Greenlander. The hull is 2 inches longer and has a straighter rocker line. This is the fastest kayak in the fleet. Ideally suited for the small to medium sized kayaker. The low volume helps the lighter kayaker control the kayak in windy conditions.

Greenlander Pro Standard Equipment

- Heavy-duty diolene reinforced construction
- Outside fiberglass seams
- Three Watertight fiberglass bulkheads
- Watertight hatches (two round 9" and 7.5" day hatch)
- Recessed deck fittings, deck lines and bungee cords
