

Romany LV

Nigel Dennis Kayaks (NDK)

Photos are of a standard Romany

Atlantic Kayak Tours Says: The Romany 16 LV (low volume) is designed for smaller paddlers. The hull design of this boat is identical to that of the Romany, but it has a lower deck (10" at the front of the cockpit), smaller cockpit and shorter front bulkhead (32" from the front edge of seat). Romany LV is designed for an optimum paddler weight under 150 lbs. The Romany LV has all of the advantages of the Romany, just made to fit smaller, lighter paddlers. It is also an ideal kayak for teenagers who want a boat that fit them and don't hold them back from doing what they want.

NDK Says: The Romany was designed in 1993 with the following features: A low rear deck for easy rolling. A white water cockpit. This gives the kayaker excellent grip, control and allows a quick exit if needed! Three compartments, including an offset day hatch, allowing the kayaker to reach into the compartment whilst at sea. Sloping rear bulkhead behind the seat, allowing the kayak to be emptied by lifting the bow (no X rescue necessary). Polished deck recesses. Plenty of room for large feet or warm winter footwear. Exceptional manoeuvrability, with direction stability. Very fast in following seas. Large round hatches Minimum weather cocking in strong winds.

Romany LV Standard Equipment

- Heavy-duty diolene reinforced construction
- Outside fiberglass seams
- Three Watertight fiberglass bulkheads
- Watertight hatches (two round 9" and 7.5" day hatch)
- Recessed deck fittings, deck lines and bungee cords
- Compass recess
- Yakima foot braces
- Dimensions: 16' long and 21.5" wide
