

Elaho

NECKY KAYAKS

Atlantic Kayak Tours Says: The Necky Elaho is good all around kayak for paddlers who like a lively boat. It was the first Necky boat that competed against the British kayaks like Valley (VCP) but without losing the Necky feel. The Elaho has the outfitting we want including a low rear deck, good backband, three bulkheads and a Valley day hatch. The Necky Elaho is available in Fiberglass, Advanced Composite and Polyethylene to fit different needs.

Necky Says: The Elaho is a low profile touring playboat. Its multi chine hull and rocker create a very playful and maneuverable craft. A snug fitting kayak with recessed deck fittings, perimeter lines, three bulkheads and day hatch, the Elaho is equipped with a rudder. The bow and stern hatches feature flush covers, effectively eliminating kick up from spray across the deck and providing a very clean, integrated look to the boat. A low stern deck, positive thigh hooks, rock solid pedals and Bomber Gear backband make lean back rolls very easy. The Elaho is also available in polyethylene construction.

Elaho Standard Equipment

Material: Fiberglass, Advanced Composite, Polyethylene
