

# Eskia

## NECKY KAYAKS

**Atlantic Kayak Tours Says:** A good kayak for taller and larger paddlers. Why do most companies feel that larger kayakers have to paddle low performance kayaks. The Eskia proves them wrong. While smaller paddlers will be lost in the Eskia, larger paddlers will have a high performance kayak. We wish Necky added a day hatch to this well outfitted kayak that includes full deck lines, recess deck fittings, flush hatch covers, flat compass area and rear spare paddle bungies. In a perfect world it would be available with a skeg instead of the rudder.

**Necky Says:** The Eskia rides on a multi chine "diamond" hull. At 24.5" wide, this kayak offers plenty of initial stability and good tracking, making the Eskia a very comfortable and easy boat to paddle. The design incorporates recessed deck fittings and perimeter deck lines. Recessed deck fittings greatly reduce the possibility of snagging gear, clothing or tender skin on deck hardware during reentries and rescues, while perimeter lines provide a sure, easy grip for a paddler trying to secure a hold on the boat from the water. Innovative flush hatches keep the deck of the Eskia super clean and lend the kayak a very integrated look.

### **Eskia Standard Equipment**

---

Material: Superlinear Polyethylene
