

Capella RM 166

P&H Sea Kayaks

Atlantic Kayak Tours Says: As this is a new line of kayaks for Atlantic Kayak Tours we don't have much to say yet. Over the next few weeks all the staff will be paddling the new P&H boats and reporting back. We will then update this page.

P&H Says: The design might be a classic British sea kayak, but the construction could not be more contemporary. Unlike most kayaks in its class, the Capella RM is manufactured using a Triple Layer Process, affording it superior buoyancy, strength and rigidity compared to single layer polyethylene models.

The Capella RM is a superb all-round sea kayak, suitable for everything from relaxed expeditions of larger rivers, lakes and coastal areas, to open crossings and multi day trips in challenging conditions. The combination of performance, durability and versatility has already made the RM the choice of many instructors and centres around the world.
