

Easky 13

P&H Sea Kayaks

Atlantic Kayak Tours Says: For paddlers 110 to 190. Stable, easy to paddle with or without the rudder. Used by lots of kayak liveries as it appeals to a wide range of paddlers. P&H classifies this boat as a light touring kayak. We have it listed as a recreational kayak because it is under 14 feet in length. The fact that it has reliable bulkheads, watertight hatches, full deck lines and thigh braces the Easky 13 performs in a class of it's own. We feel that dual bulkheads/water tight hatches and deck lines make for a much safer kayak. These are items you will not find on many other recreational kayaks.

P&H Says: The Easky 13 is extremely stable, forgiving and has a good turn of speed for a kayak at this length. Its predictable and easy going feel will give hours of gentle touring around inshore coastal areas and on inland waters, perfect for those people who are totally new to kayaking or wish to just simply explore the recreational environment at their ease. Front and rear watertight hatches also give the ability to carry all the equipment required for slightly more adventurous trip and picnics, or just that fantastic piece of driftwood you spot! The elastic deck net keeps sun screen, glasses, snacks and a refreshing drink close at hand too. It can also be fitted with an optional rudder system to give greater manoeuvrability in confined locations if required.

(Also available without hatches for those not requiring this feature)
