

Easky 15

P&H Sea Kayaks

Atlantic Kayak Tours Says: For paddlers 140 to 220. A great entry level touring kayak suitable for the Hudson River. The skills you learn while paddling this kayak will be transferable to any sea kayak (edging, rescues). Exceptional efficiency and maneuverable for this class of kayak. You need to paddle this boat to understand how well it performs compared to its competition. Available with skeg.

Double sealed foam bulkheads. Full deck lines and bungees. Two full rubber hatch covers (same as on expeditions sea kayaks). Rudder compatible. Higher seat back and larger cockpit. Molded in thigh hooks (only found on higher end kayaks). Great value for the price.

P&H Says: The Easky 15 has all the stable, easy to paddle nature of its little brother, but with a narrower beam (23.5" width) and longer overall length (15' so it has a real 'sea kayak' feel. This also gives it a greater overall turn of speed and allows the slightly more adventurous or sporty paddler to enter in to the realm of real sea kayaking and longer day touring trips. This increased overall performance and the option of fitting an integral skeg (fin on the rear of the hull) system provides the ability to handle a greater range of weather conditions and tidal currents. The fitting of an optional rudder system also gives greater manoeuvrability in confined locations. Two waterproof compartments with rubber hatch covers, deck lines and deck nets provide all the features necessary to handle open water conditions.

Easky 15 Standard Equipment
