

Pintail

Valley Canoe Products (VCP)

Atlantic Kayak Tours Says: Take an Anas Acuta, round off the chines and add a bit of beam for stability and you have a Pintail. Fits a larger paddler than the Anas Acuta, but does not track as well as the Anas (which is also not known for tracking). Some people call it the Pin Wheel as it spins like a Pin Wheel. Put it in the hands of a good paddler and there may not be a more fun kayak to paddle.

The Pintail will help develop good paddling skills. The Pintail is a good day paddling, surfing, rock garden kayak, but large enough to camp from. Everyone should try paddling the Pintail. You will know where your paddling skills stand. Paddlers sometimes forget that kayaking should be fun, the Pintail will remind good paddlers how much fun kayaking is. The Pintail is a unique kayak in a field of copycat designs. It deserves more attention.

VCP Says: The Pintail is based on the classical lines of the Iqolorssuit Kayaks, but with rounded bilge hull sections to produce a good boat for lighter loads, lighter paddlers, and shorter trips. It is a rough weather boat with minimum windage. This is one of our most popular designs due to its maneuverability, low windage and ease of paddling. It appeals to many kayakers who want to do either easy cruising with a lightweight, quick and stable boat, or those kayakers who use ocean waves, surf, rock gardens and sea caves as their playgrounds. Available with two cockpit sizes: keyhole and ocean.

Pintail Standard Equipment

- Heavy-duty diolene reinforced construction
